

As a result of this Summit, I will...

- Find additional partners for sustainable efforts.
- Become a volunteer for education about climate change and sustainability.
- Put compost on plant native grasses.
- Work to create new partnerships and strengthen additional ones.
- Recognize that sustainability and social justice issues have a commonality.
- Compost.
- Become a champion for community.
- Expand the number of EV charging stations.
- Build more partnerships to do cool stuff in the region.
- Disseminate info to my colleagues and check our compostable waste content.
- Double up my personal effort to make my agency more sustainable.
- Reduce greenhouse gas emissions.
- Recycle.
- Vermiculture.
- Continue to be persistent and seek partnerships as I expand my sustainability networks.
- Have the inspiration to try to replicate some of these ideas in my new job in Idaho.
- Look into submitting MRWMD's data on our AD, landfill and biosolids compost to Dr. Vergara's comparative lifecycle pool.
- I will get a ranch site doing in Monterey County and maybe one in San Benito County.
- Learn how I can promote the initiatives at Rancho Cielo.
- Find the best, most impactful way I can contribute to Monterey Bay Community Power and its goals and successes.
- Seek more grants to support carbon farming.
- Be inspired to fund more solar with compact members!
- Learn more about SEED.
- Renew my commitment to reuse: buying second hand.
- Get Sandbar Solar more involved in the environmental movement in the Monterey Bay Area! Thank you for all the resources!
- Set long-term ASE goal.
- What my LB wants.
- Add value to every Community Choice Energy program in CA
- Advocate for more diversity in the people represented as part of this event and group
- I won't change a thing; I'm already actively engaged.
- Become familiar with my local agencies efforts on sustainability.
- Speak with the relevant local governments in Senegal and W. Africa about grass planting carbon sequestrating and landfill recycling programs.
- Focus on collaboration in my sustainability endeavors.
- Look up www.buyitonce.com
- Support the Monterey Bay Aquarium's effort to connect ocean ecosystems and climate change.
- Join the California Carbon Project to identify local sites to replicate the carbon farming being conducted by the Marin Carbon Project.
- Support the 37 MW of municipal solar projects moving forward with SEED; Expand to remaining 14+ local jurisdictions for even bigger impact.
- Continue to replicate and expand Monterey Bay Carbon Fund projects throughout the region.
